

LAKE SIDE LIVING

THE VANOISE I

THE VANOISE II

THE VANOISE III

■ THE CHAMBORD COLLECTION

THE VANOISE

The harmonious design of The Vanoise sets the stage for a comfortable, easy way of life in this French Country classic with its multi-dimensional, gabled roofline and quintessential detailing. The Vanoise I features include stone, complemented by brick lintels, and bold wood beams framing the covered front porch. A stone and stucco exterior with slat wood shutters is distinguished by an expansive feature window and arched entry to the covered porch on the Vanoise II. All plans afford a spacious 2,093-square-foot main level with an elegant entry leading to a great room with a double-sided gas fireplace shared by the keeping room just off the open kitchen. The large master suite opens to the back porch, as does the great room and keeping room. A study that can double as a second main-floor bedroom with full bath are located off the entry, while the laundry room provides a convenient entry from the oversized garage to both the kitchen and the master bath. For more space, add the 1,396 terrace level with two guest rooms, a Jack-and-Jill bath and family room. Additional storage also is achieved with the terrace addition.
